INTRODUCTION

We work actively with the managements of portfolio companies to seize new opportunities in their respective industries.

At the heart of everything we do, our purpose is to make investing rewarding, accessible and affordable by employing smart technology and even smarter people. We recognise over the long-term, no one asset class is guaranteed to deliver consistent returns. We believe you should invest across all asset classes in different proportions to manage risk and achieve your financial goals. We focus on forex, cryptocurrencies, energy, factoring, retail, real estate and especially construction.

CONTINUED

We can acquire a majority or minority stake in companies to create a more active and supportive shareholder base. Achievers Finance in the right place and time, taking into account sectorial trends and the ever-changing social and economic developments, will continue to invest in the investment sector. And continue to bring it to the investors.

Tescomart Club combines all these assets to provide the start-up firms they work with a far better than average chance of local and international success. Our aim is to improve the operational performance level of portfolio companies, strengthen their competitiveness thereby increasing their market value. We provide opportunities to investors to get into a partnership with our portfolio companies.
